

CRIMSON TRANSACTION TECHNOLOGIES ACHIEVES TWO NEW FISERV CERTIFICATIONS, STRENGTHENING PAYMENT INNOVATION FOR NORTH AMERICAN MERCHANTS

Burlington, ON & Toronto, ON – January 14th, 2025 – Evenica today announced that its alliance partner, Crimson, has achieved two significant Fiserv certifications, reinforcing both organizations' shared commitment to staying ahead of the curve in the rapidly evolving payments landscape.

Crimson has successfully completed **Fiserv EMV Level 3 certification** on the new **Verifone M400 series of payment terminals**. This certification supports all major credit and debit card brands across North America and enables secure transactions via **tap, chip, or swipe**. Crimson will begin rolling out this certification in the coming weeks to one of Fiserv's largest merchants, supporting annual credit and debit card volumes exceeding **\$14 billion**.

In addition, Crimson has achieved **Fiserv Gift Card certification** on the **Secure Transport North platform**. This certification enables merchants to leverage the **Fiserv Closed Loop gift card solution**, helping them increase brand awareness, drive repeat business, and improve overall customer retention through a seamless and secure gift card experience.

“These certifications reflect our collective focus on innovation, security, and scalability in the payments ecosystem,” said Sadek Ali, Co-Founder and CEO at Evenica. “With Crimson’s commitment to continued certification, we’re ensuring our customers are equipped with future-ready payment solutions that support growth, resilience, and exceptional customer experiences.”

Crimson’s latest certifications further strengthen the alliance between Evenica and Crimson, combining deep technical expertise with a forward-looking approach to payments. Together, the partners continue to invest in modern payment capabilities that help merchants adapt to changing consumer expectations and regulatory requirements - without compromising performance or security.

For merchants navigating increasing payment complexity, these achievements underscore a shared mission: to deliver reliable, compliant, and innovative payment solutions that power long-term success.
